No problem at all. Was on my list to check in with ERG today anyway.

I am in Golden, CO for next few days. Reachable by email and my cell if needed.

Thanks,

Mark

I do know – I had no doubt that you had everything done. I just wanted to make sure that my HQs was right in what they were saying! Thanks for checking.

I just heard back from ERG. They told me that the ball is in their court and they are confirming that they have everything needed/done in order for us to start work as soon as task order is issued. I will keep you posted if I hear anything else.

You know me and paperwork... I got everything finished that I was provided within a couple days.

I hear from my HQs project officer that AlterEcho has not completed the contracting process yet for the new ERG contract, so you are not available to begin work. Would you double check with ERG that you have all of your paperwork in, so that you can begin work as soon as the task order is approved?
